ESPECIE DOMINANTE & DICAS DE PESCA

Especie mais capturada: Lucio (10.2 kg total)

> Melhores horas: madrugada (5h-8h) e final da tarde (17h-20h).  
> Rede mais eficaz com Tw > 16C e nivel estavel ou subir.  
> Evitar rede em ventos > 25 km/h (deriva excessiva).  
> Zona preferencial: margens com vegetacao submersa.

COMPARACAO COM SESSOES ANTERIORES

Sessoes registadas : 10  
Media por sessao : 1.1 peixes / 1.6 kg  
Melhor sessao : 11/05/2026 — 3 peixes / 4.9 kg  
Fase com + capturas: Minguante Fim

Rosa dos Ventos  
(dir. dominante: NW)

The wind rose chart displays wind frequency by direction. The dominant wind direction is NW, indicated by a red arrow and labeled 'Dom.'. The chart shows that winds from the NW and WNW are the most frequent, followed by winds from the N and S. The chart is divided into 16 directions: N, NNE, NE, ENE, E, ESE, SE, SSE, S, SSW, SW, WSW, W, WNW, NNW, and NNE.

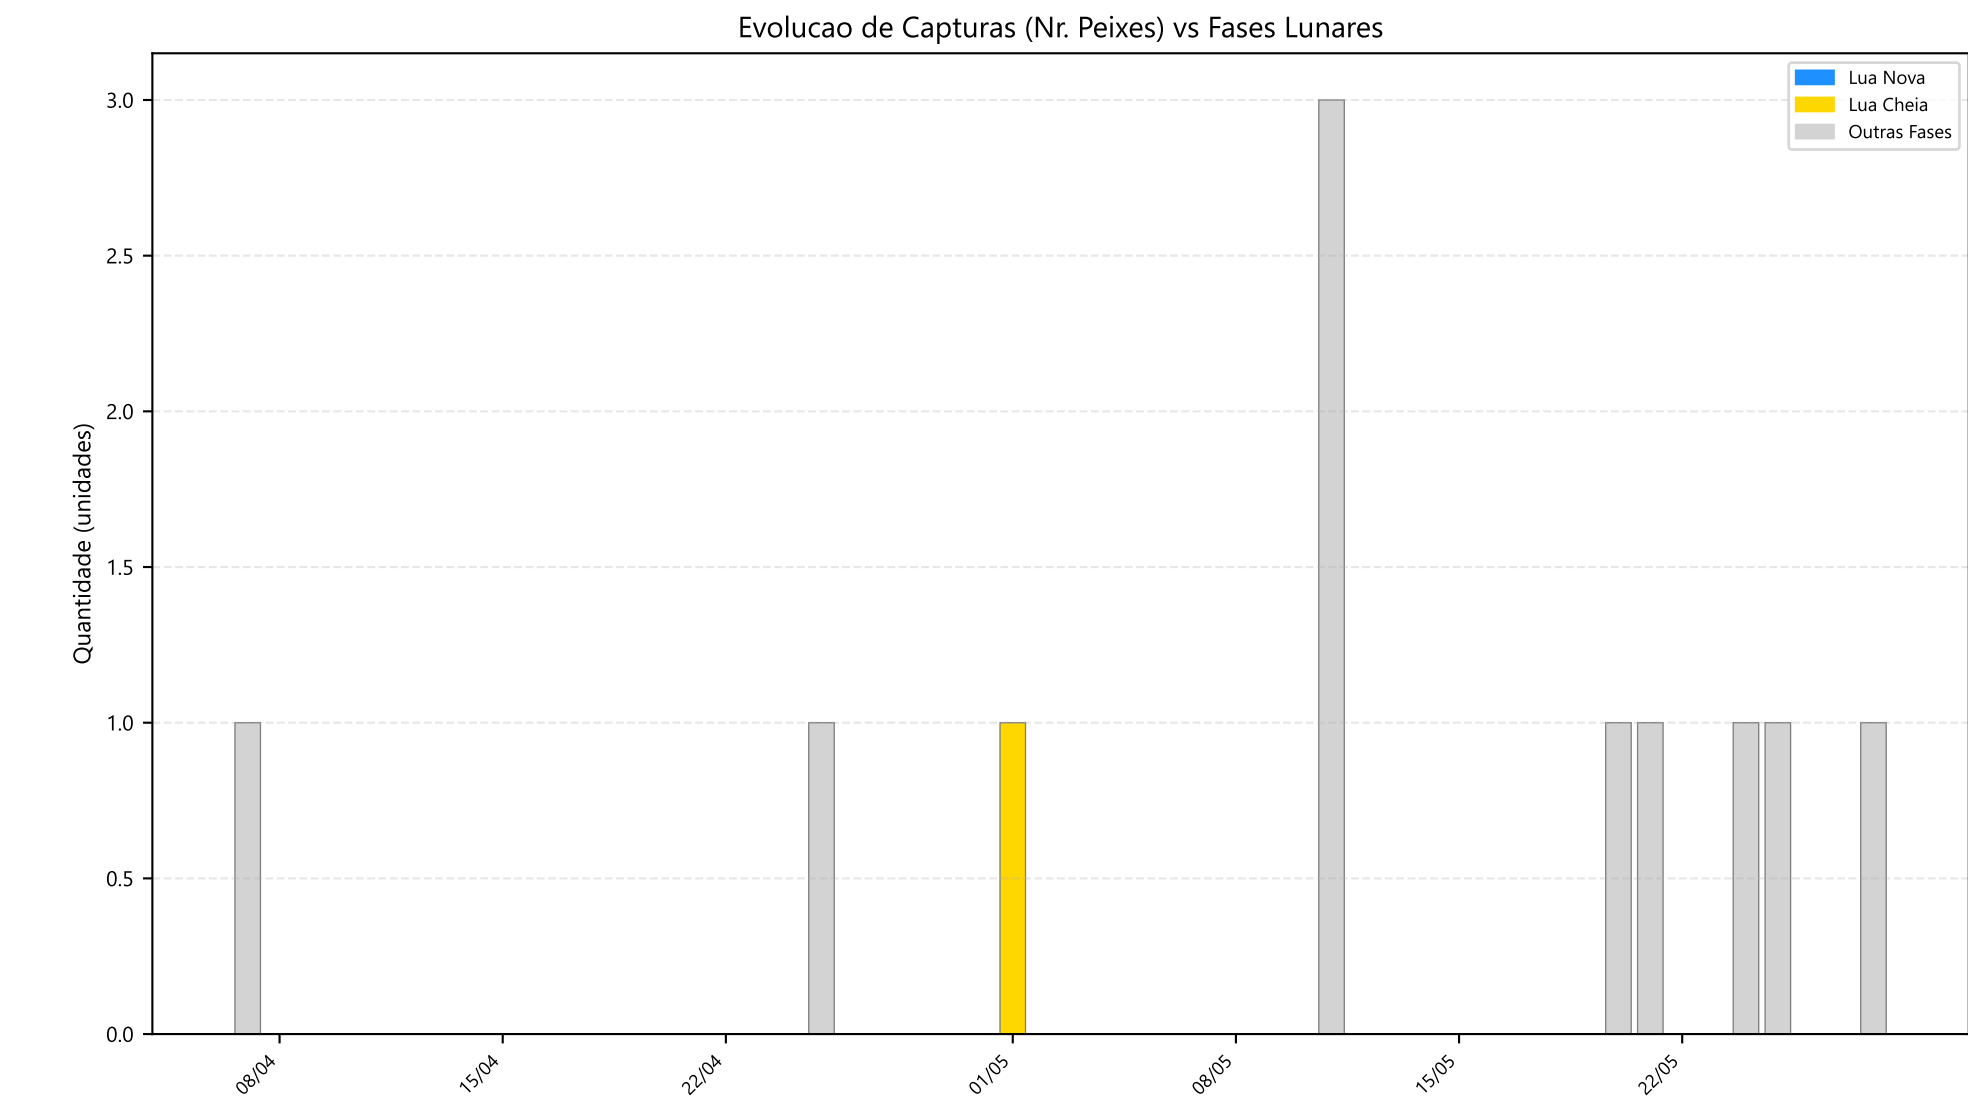

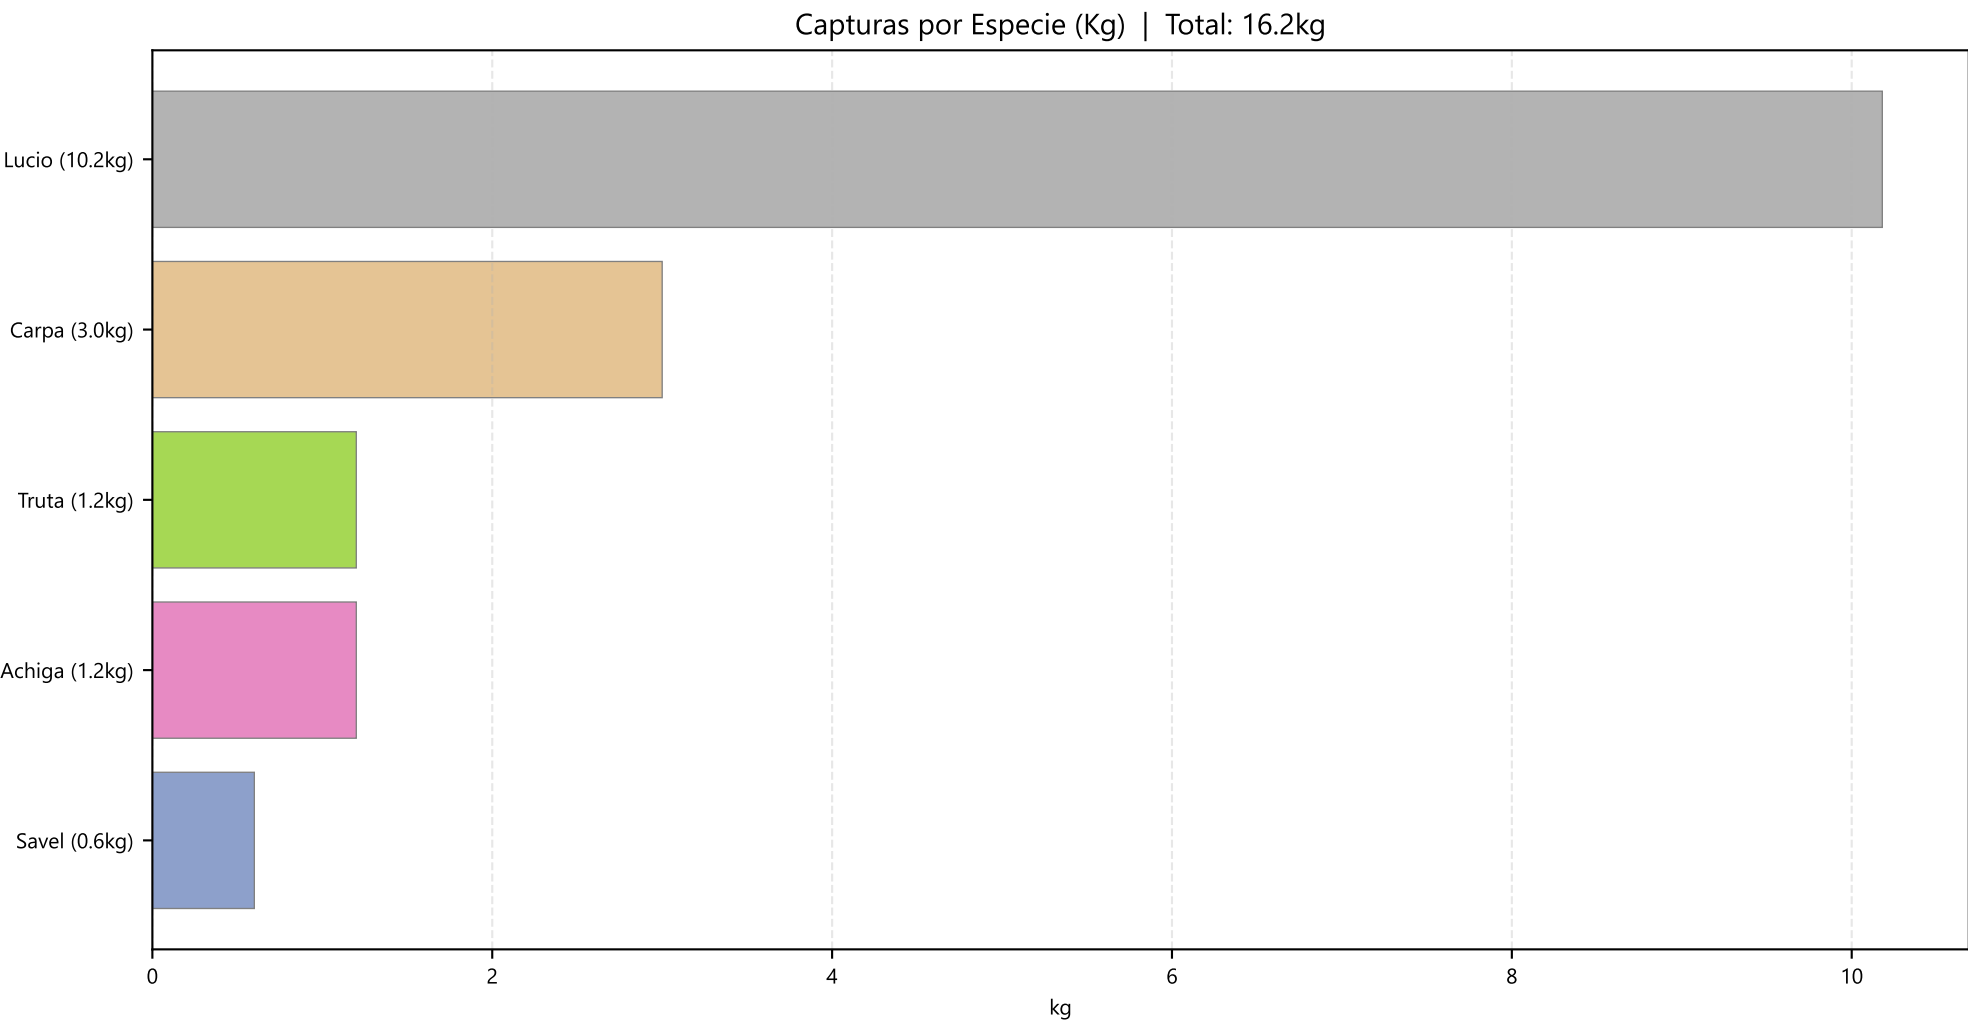

| Direction | Frequency (approx.) |
|-----------|---------------------|
| N         | 10                  |
| NNE       | 5                   |
| NE        | 5                   |
| ENE       | 5                   |
| E         | 5                   |
| ESE       | 5                   |
| SE        | 5                   |
| SSE       | 5                   |
| S         | 10                  |
| SSW       | 5                   |
| SW        | 5                   |
| WSW       | 5                   |
| W         | 10                  |
| WNW       | 15                  |
| NNW       | 10                  |
| NNE       | 5                   |

VALIDACAO DA SABEDORIA POPULAR (Correlacao Lua x Capturas):

[NAO] NAO VALIDADA: apenas 9.1% em fases favoraveis.  
Outros fatores dominam (nivel, pressao, Tw).
